Montevideo besieged.—Captain Brown of the brig Perseverance, who arrived this forenoon from the river La Plata, informs that the British squadron under the command of Admiral Sterling had laid siege to Montevideo for fourteen days, and was bombarding the town when he came out of the roads. The British expected a reinforcement hourly, sufficient to enable them to carry the place with ease.

Massacre of St. Domingo.—Capt. Chase, who arrived at Boston on the 22d inst. in 21 days from Guadaloupe states that when he left there a report prevailed and was believed, that the blacks in St. Domingo had murdered all the white and coloured people, including among the former all the Americans.——We give the above report as we find it, through there is very little probability of its truth.

Extract of a Letter from a gentleman in N. York, to a captain in Philadelphia.

"I take the liberty of writing you, in order to acquaint you of a *reef* which we discovered to the northward of *Gaspar Island*, it is in lat. 1, 56 1-2 or 57 S. by meridian altitude of sun, Gaspar Island, bearing from the Reef S. 10 deg. distant about 10 or 11 leagues, being perfectly clear to the southward, Gaspar Island, in sight from the deck, just like a Haycock, flattened at the top, and the top of the base of or that part, of it, just above the horizon, from the foretopsail yard—sounded in a boat upon the reef twelve feet, but the clump of coral seemed shoaler, in some places they run their oars down upon them, being cloudy over Banca, could not get any cross bearings—soundings when passing it 19 to 12 fathoms close to the shore—it appears to be small, in two little clumps, not extending more than 80 fathoms, S. E. by S. & N. W. by N. and about 15 or 20 fathoms broad. Being calm at the time we discovered it, by the current rippling over it, must be *very dangerous*, as it will never break upon it, the colour of the water only discovers it. I would wish you to make it as public as possible."
